About Us

Mitosis Enterprise was established in 2005 by Julius Mebe, its Chief Executive Officer, after acquiring vast experiences in both the public and private sector. He has worked for Mitosis Enterprise contracted to the Department of trade and Industry, and then went to work for Department of trade and Industry directly. He has stints with Business Connexion and Gigima AST (contracted to Limpopo Local Government tasked with establishing a digital presence for the province's municipalities.

Vision Statement

Mitosis Enterprise realizes the big hole that exists in townships pertaining to Information Communication and Technology. Elsewhere in the world you hear of youth working from their domestic garages to create inventions that went on to change the world (Microsoft, Apple, etc.). A tremendous lack of resources is a primary hindrance in our townships. We believe with determination and talent, that I'm sure exists, we can have a phoenix rising, build it all from scraps, literally and figuratively.

Testimonials

For the past 24 months I have been a supplier to MetalSA (Formerly ISE) in Brits.

Products

We pride ourselves on developing solutions that give customers savings in real terms. Our friendly, experienced and talented team has vast experience developing solutions in a variety of sectors including utilities, education and health.

Our ethos is to listen carefully to our clients' requirements to ensure we understand their businesses, their challenges and issues before considering our solution. We talk to clients in a language they understand, not in the jargon used in the world of technology, and believe our professional, straightforward approach is appreciated by our customers.

If you choose to work with us, you can look forward to an honest, plain-speaking relationship. You can have complete confidence in our ability to deliver – our dedicated team is hugely-well qualified in IT and software development.

Our aim is to surpass expectations and to build long-lasting relationships with clients safe in the knowledge that we will deliver projects on time and on budget.

Managing Director Julius Mebe established Mitosis Enterprise in 2005. Both have huge experience in innovative software development. He also has extensive background in customer service and business development.

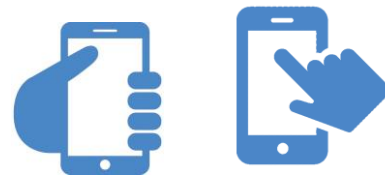

Mitosis Enterprise is a software and web development company that uses cutting-edge technology to create efficiencies for small and medium sized businesses and other organisations.

- Municipal App
 - All in one app with primary goal of optimising service delivery
- Complaint Management System

Services

- Mobility

Afro Centro Techno recognised the importance of mobility in the journey of digital transformation. The rapid adoption of mobile technologies in business creates opportunities to engage and interact with users in non-traditional ways. Afro Centro Techno has developed innovative solutions that leverage the unique capabilities of these mobile devices and technologies to enable efficient mobile workforces across many industries.

- Manages Services

Mitosis Enterprise has a multi-pronged approach to enabling and transforming business through effective ICT.

- Infrastructure Services – Full Lifecycle management of all ICT infrastructure.
- Enabling Business – Enabling People and Business through the provision of specific services.
- Digital Transformation – Assisting business to be competitive through digital automation and optimisation.

These services are offered across the domains of ICT Service Management, End User Computing, Unified Communication, Compute Platforms, and Applications.

- Cloud Enablement

Afro Centro Techno is a systems integrator that truly understands the nuances of multi-layered multi-disciplined technology landscapes. By working as a strategic partner with many large corporate customers, Afro Centro Techno provides assisting clients through these challenging journeys providing clarity and industry know how.

- Systems Integration

The Afro Centro Techno Systems Integration solutions helps clients in Industrial and Public Sector industries set strategic ICT goals in support of business strategy, find solutions to achieve these goals and addresses all aspects of governance, portfolio and application management, design, and integration across the full technology lifecycle.

Our scalable services and practices enables customer to identify goals, develop, implement, and manage systems based on business value, and manage risk. Afro Centro Techno offers a range of solutions, from ICT strategy and governance, portfolio management, professional services, emerging technologies, custom development capability, established packaged software, and application outsourcing, management and support services to address industry-wide as well as company specific requirements.

Social Responsibility Programmes

Mitosis Enterprise realizes the big hole that exists in townships pertaining to Information Communication and Technology. Elsewhere in the world you hear of youth working from their domestic garages to create inventions that went on to change the world (Microsoft, Apple, etc.). A tremendous lack of resources is a primary hindrance in our townships.

Rudimentarily, we aim to create science clubs, which will spawn other clubs like the robotics club that are more technology immersed.
